

AHTESHAM AHMED

Full Stack Developer & AI Engineer

ahteshamahmed402@gmail.com | +92 3182158057 | Karachi, Pakistan

GitHub: github.com/ahteshamahmed12 | <https://www.linkedin.com/in/ahtesham-ahmed-qadri-a7574125a/>

PROFESSIONAL SUMMARY

Full Stack Developer with 2+ years of hands-on experience building scalable SaaS platforms, AI-integrated applications, and production-ready systems. Specialized in modern web technologies (Next.js, Fast API, Python, Typescript) and AI agent architecture (Claude SDK, OpenAI SDK, OpenCLAW, Forward Deployment and Engineering). Strong foundation in backend design, database optimization, and cloud deployment. Currently interning at Softiq tech while pursuing BBIT degree and Agentic AI Engineering certification. Proven ability to ship end-to-end applications from concept to production.

CORE COMPETENCIES

Frontend: Next.js 14 (App Router, SSR), React.js 18, TypeScript, Tailwind CSS, HTML5, CSS3, Responsive Design, Web Accessibility

Backend: Python, Fast API, RESTful APIs, Async/Await, Web Sockets, Database Design & Optimization, RBAC Implementation

AI/ML: Claude SDK, OpenAI SDK, LLM Integration, AI Agent Architecture, Prompt Engineering, Tool Use & Function Calling, OpenCLAW, Loop engineering, Harness Engineering, Prompt engineering

Database: PostgreSQL, SQL Alchemy ORM, Redis Caching, Query Optimization, Connection Pooling, Relational Data Modeling, MongoDB

DevOps & Tools: Docker, GitHub Actions (CI/CD), Git/GitHub, Vercel Deployment, Figma, VS Code, npm/pip, Postman, Swagger/Open API

Cloud & Scalability: Microservices Architecture, Monolithic Architecture, Horizontal Scaling Patterns, Rate Limiting, Session Management

PROFESSIONAL EXPERIENCE

Full Stack Developer

Freelance / Self-Employed | Jan 2024 – Present | Karachi, Pakistan

- Designed and developed 5+ complete web applications ranging from SaaS platforms to e-commerce solutions
- Built production-ready systems handling real-time features (WebSockets), database optimization, and user authentication
- Currently managing 3 active client projects with ongoing feature development and performance optimization
- Implemented responsive interfaces with Tailwind CSS; achieved 95+ Lighthouse performance scores
- Developed RESTful APIs with FastAPI; optimized query performance reducing response time by 60%
- Deployed applications using Vercel (frontend) with Docker containerization for backend services
- Core Technologies: Next.js, React, TypeScript, Python, FastAPI, PostgreSQL, Redis, Docker

Full Stack Developer (Internship)

Softiqtech | August 2026 – Present | Karachi, Pakistan

- Contributing to full-stack development projects using modern web technologies
- Collaborating with team on architecture decisions and code quality standards
- Gaining enterprise-level experience in building scalable backend systems and frontend applications
- Mentoring junior developers on full-stack best practices and emerging technologies

FEATURED PROJECTS

Project Management SaaS Platform (PM-SaaS)

Enterprise-grade task and project management application with real-time collaboration features. Designed and built complete backend and frontend from scratch.

- Architecture: Microservices-ready design with clear separation of concerns (service layer, data layer, API layer)
- Backend: FastAPI with 10+ SQLAlchemy ORM models, JWT authentication, role-based access control (RBAC), WebSocket real-time notifications
- Database: PostgreSQL with optimized queries, Redis caching layer, connection pooling, indexed schema for 1M+ record queries
- Frontend: Next.js 14 with React, TypeScript, Tailwind CSS; responsive design across all devices
- Features: Team collaboration, sprint management, task automation, analytics dashboard, export to PDF/Excel, activity audit logs
- DevOps: Docker containerization, Docker Compose orchestration, Nginx reverse proxy configuration
- Performance: Handles 100+ concurrent users; API response time <200ms; database queries optimized with N+1 prevention
- Tech Stack: FastAPI, PostgreSQL, Redis, Next.js, React, TypeScript, Tailwind CSS, Docker, Nginx, JWT, SQLAlchemy, Pydantic

Hospital Appointment Booking Agent (WhatsApp AI Bot)

Intelligent conversational agent for hospital appointment scheduling. Patients message via WhatsApp; Claude SDK processes natural language and books appointments into hospital database.

- AI Integration: Claude SDK with tool use for appointment confirmation, database interaction, patient data retrieval
- Backend: FastAPI with async request handling, Supabase (PostgreSQL + pgvector) for relational data and vector embeddings
- Architecture: WhatsApp Business Cloud API integration, session state management in Redis, appointment schema in PostgreSQL
- Features: Natural language appointment booking, real-time availability checking, patient communication via WhatsApp, database persistence
- Real-Time: Handles concurrent patient requests with proper session isolation and error recovery
- Tech Stack: Claude SDK, FastAPI, Supabase, WhatsApp Business API, Redis, PostgreSQL, Python, Pydantic

E-Commerce Platforms (Production Deployments)

Built and deployed 2 production e-commerce applications: Sorax industrial Solution, Rubinas Fragrance and Baby Wood

- Frontend: Next.js 14 (App Router), React, TypeScript, Tailwind CSS with responsive design

- Features: Product catalog, shopping cart, checkout flow, order management, payment integration readiness
- Performance: Optimized for speed; 95+ Lighthouse scores; fast image loading with Next.js Image optimization
- Deployment: Live on Vercel with continuous deployment from GitHub
- User Experience: Animated components, accessible navigation, mobile-first design
- Tech Stack: Next.js, React, TypeScript, Tailwind CSS, Vercel, GitHub

EDUCATION

Bachelor of Business & Information Technology (BBIT)

Virtual University | Expected Graduation: 2027

Coursework: Software Engineering, Database Design, Web Technologies, Business Analysis

Agentic AI Engineering Diploma

GIAIC (Panaversity Ecosystem) | 2024 – Present

Focus: LLM Integration, AI Agent Architecture, Prompt Engineering, Tool Use & Function Calling

Diploma in Basic Python

CCEE, Ned University | Completed 2023

Intermediate (Science)

Govt Superior Science College | Graduated: 2022
